EXAMINER'S AMENDMENT

The following changes to the drawings have been approved by the examiner.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. **Therefore, the light tube intersecting with the roof must be shown or the feature(s) canceled from the claim(s).** No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose a skylight with a tapered light tube which is straight sided along its entire length. Martinet discloses a light tube that is round but is tapered from top to bottom, being wider at the top of the tube. It would have been obvious to have combined the round, tapered light tube to be rectangular in cross section, but even then the light tube will not be straight sided along its entire length. Forming the light tube of Martinet or any of the relevant prior art to have a taper with the tube wider at the top along with straight sided sides along the entire length would not have been an obvious design choice, and forming an obviousness rejection would be use of impermissible hindsight. Skylights of the prior art do in fact have tapered light tubes but they are tapered with the wider part of the tube located at the bottom, and without the use of impermissible hindsight, there is no reason to flip the skylight systems to locate the wider portion at the top.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RYAN D. KWIECINSKI whose telephone number is (571)272-5160. The examiner can normally be reached on Monday - Friday from 9 am to 5 pm.
